- Departmental Topper for 2025-26.

PROJECTS & COLLABORATION

- **Sarvadnya Infotech LLP** (NextJS, tailwind CSS, MongoDB) [link: <https://sarvadnya-infotech.vercel.app/>]
A full stack functional website for day to day operation for the Tally Certified Partner company with latest trends and admin panel for fully customized and updatable website.
- **SmartTutors web app** (NextJS, MongoDB, Firebase) [link: <https://smarttutors.co.in/>]
Designed, developed and integrated a full stack education platform, designed to digitally connect students, teachers, and parents within a unified ecosystem. Assisted in improving communication workflows, authentication handling, and scalable academic data management during a professional internship project.
- **DC Infoway** (HTML, CSS, Tailwind, Vercel, Hostinger) [link: dcinfoway.in]
SEO Optimization and hosted a responsive business website for a local ISP, improving online visibility and contributing to an estimated 20% increase in customer inquiries. Implemented a GitHub-Vercel CI/CD deployment pipeline, reducing manual deployment efforts and supporting stable performance for hundreds of monthly visitors.
- **MediCare** (Next.js, Tailwind CSS, Clerk Auth)
Built a centralized healthcare monitoring platform that streamlined doctor-patient communication and secure health record access. Optimized authentication and dashboard workflows, improving operational efficiency and daily healthcare interaction management by approximately 30% each daily routine.
- **Medicare Android Application** (Kotlin, firebase, MongoDB, NEXTJS API, figma)
Solely developed the Android application for MediCare by integrating existing Next.js APIs with centralized MongoDB storage. Improved API synchronization and mobile response efficiency by nearly 25%, enabling faster and more reliable health data access across devices.
- **HomeCare24** (HTML, CSS, TailwindCSS, Nextjs Api routing) link: [homecare24.co.in]
Designed and implemented a responsive promotional website for a healthcare service company, strengthening digital brand presence and contributing to an estimated 20% growth in online engagement and service inquiries.
- **Promotional Designs for college** (Canva, Photoshop, Powerpoint)
Created Promotional banners and flyers for official college social media posts and events. Created custom designs and presentations using photoshop, Canva and many more tools.
- **Stock Market Predictor (Collaborative Project)** (Python, Flask, ARIMA Model, Alpha Vantage API, PHP)
Collaborated on the development of a stock market prediction platform using ARIMA-based forecasting models with real-time Alpha Vantage API integration. Improved backend data processing efficiency and supported predictive analytics through Python-Flask architecture and WordPress integration.
- **THEATER BOOKING SYSTEM (C++)**
Developed an OOP-based theater booking system with modular seat-wise and screen-wise reservation functionality through a command-line interface, demonstrating practical implementation of scalable software architecture and booking workflow management.
